Index of Subjects

Aeromonas, mannose-resistant adhesion of motile, to INT407 cells and the differences among isolates from humans, food and water, 173
AIDS, civil war and the spread of, in Central Africa, 71
Arboviruses, seroepidemiology of, among seabirds and island residents of the Great Barrier Reef and Coral Sea, 435
Astrovirus, a dot-blot hybridization procedure for the detection of, in stool samples, 405

Blatta, cockroaches (and *Periplaneta* species) as reservoirs of drug-resistant salmonellas, 357
Bluetongue in the Sultanate of Oman, a preliminary epidemiological study, 89
Brugia malayi, the dynamics of microfilaraemia and its relation with development of disease in periodic, infection in South India, 453

Calves, the epidemiology of salmonella in: the role of markets and vehicles, 521
Campylobacter, jackdaws and magpies as vectors of milkborne human, infection 363
Chicken, the prevalence of *Salmonella enteridis* and other *Salmonella* spp. among Canadian registered commercial, broiler flocks, 203
Clostridium difficile, gastrointestinal carriage of, in cats and dogs attending veterinary clinics, 659
Clostridium difficile, relapse versus reinfection with, 627
Cockroaches (*Blatta* and *Periplaneta* species) as reservoirs of drug-resistant salmonellas, 357
Cockroaches (*Blattella germanica*) as carriers of microorganisms of medical importance in hospitals, 183
Corynebacterium, a numerical analysis of ribosomal RNA gene patterns for typing clinical isolates of, group D2, 263
Corynebacterium jeikeium, HSP 90, yeasts and, 273
Cryptosporidiosis, an outbreak of, associated with a swimming pool, 497
Cryptosporidiosis, an outbreak of waterborne, in Swindon and Oxfordshire, 485
Cryptosporidiosis in the Isle of Thanet; an outbreak associated with local drinking water, 509
Cytomegalovirus, prevalence of, infection in Italy, 421
Cytomegalovirus, relationship between, and colonization of the oropharynx by Gram-negative bacilli following renal transplantation, 411

Disasters, epidemiology and infection in famine, 241
Drinking water, cryptosporidiosis in the Isle of Thanet; an outbreak associated with local, 509

Enterobacter cloaceae, the use of the PhP-KE biochemical fingerprinting system in epidemiological studies of faecal, strains from infants in Swedish neonatal wards, 311
Enterobacteriaceae, study of colonization resistance for, in man by experimental contamination and biotyping as well as the possible role of antibodies in the clearance of these bacteria from the intestines, 619
Erysipelothrix rhusiopathiae, characterization of a protective protein antigen of, 637
Escherichia coli, the population structure and transmission of, in an isolated human community; studies on an Antarctic base, 537
Escherichia coli, the serological relationship between *Yersinia enterocolitica* O9 and, O157 using sera from patients with yersiniosis and haemolytic uraemic syndrome, 349

Famine, epidemiology and infection in, and disasters, 241

Gastroenteritis, a large outbreak of, associated with a small round structured virus among schoolchildren and teachers in Japan, 83
Gonococcal, changing trends of, infection in homosexual men in Edinburgh, 585
Gram-negative bacilli, relationship between cytomegalovirus and colonization of the oropharynx by, following renal transplantation, 411

Gregg, Sir Norman McAlister: a tribute, 1
Gut microflora, morphometrical parameters of, in human volunteers, 383

Haemolytic uraemic syndrome, the serological relationship between *Yersinia enterocolitica* O9 and *Escherichia coli* O157 using sera from patients with yersiniosis and, 349
Helicobacter pylori, differentiation of strains of, by numerical analysis of 1-D SDS–PAGE protein patterns: Evidence for post-treatment recrudescence, 607
Helicobacter, transmission of, spp. A challenge to the dogma of faecal–oral spread, 101
Hepatitis A, a serologically confirmed, case-control study, of a large outbreak of, in China, associated with consumption of clams, 651
Hepatitis B, evaluation of enzyme immunoassay (EIA) as a screening method for, markers in an open population, 673
Hepatitis C virus, heterosexual and homosexual transmission of: relation with hepatitis B virus and human immunodeficiency virus type 1, 667
Hepatitis virus B, heterosexual and homosexual transmission of hepatitis C virus: relation with, and human immunodeficiency virus type 1, 667
HSP 90, yeasts and *Corynebacterium jeikeium*, 273
HTLV-I, a serosurvey for, among high-risk populations and normal adults in Egypt, 429
Human immunodeficiency virus, heterosexual and homosexual transmission of hepatitis C virus: relation with hepatitis B virus and, type 1, 667

Isolator, physical protection against airborne pathogens and pollutants by a novel animal, in a level 3 containment laboratory, 159

Legionnaires' disease, an outbreak of, in Gloucester, 135
Legionnaires' disease, control of endemic nosocomial, by using sterile potable water for high patients, 591
Legionnaires' disease, incrimination of an environmental source of a case of, by pyrolysis mass spectrometry, 129
Leptospirosis, antigens recognised by the human immune response to severe, in Barbados, 145
Listeria, the isolation of, species from fresh-water sites in Cheshire and North Wales, 237
Listeria, the occurrence of, species in pâté: the Cardiff experience 1989, 113

Melioidosis, sudden unexplained death syndrome – a new manifestation in, 577
Microfilaraemia, the dynamics of, and its relation with development of diseases in periodic *Brugia malayi* infection in South India, 453
Mycoplasma pneumoniae, ten and a half years seroepidemiology of, infection in Denmark, 191

Neisseria meningitidis, characterization of, isolates by ribosomal RNA gene restriction patterns and restriction endonuclease digestion of chromosomal DNA, 253

Periplaneta, cockroaches (*Blatta* and, species) as reservoirs of drug-resistant salmonellas, 357
Pneumonia, an outbreak of, and meningitis caused by a previously undescribed Gram-negative bacterium in a hot spring spa, 373

Restaurants, development of standard inspections in, using visual assessments and microbiological sampling to quantify the risks, 393
Rinderpest, a mathematical model of, infections in cattle populations, 441
Rubella in the developing world, 65
Rubella in the United Kingdom, 33
Rubella in the United States: towards a strategy for disease control and elimination, 57
Rubella: laboratory diagnosis of, past, present and future, 3
Rubella vaccines: past, present and future, 19

Salmonella, the epidemiology of, in calves: the role of markets and vehicles, 521
Salmonellas, cockroaches (*Blatta* and *Periplaneta* species) as reservoirs of drug-resistant, 357
Salmonella, the prevalence of *Salmonella enteritidis* and other, spp. among Canadian registered commercial chicken broiler flocks, 203

Salmonella typhimurium, gentamicin-resistant, phage type 204c: molecular studies and strain diversity in a putative bovine outbreak, 215
Salmonella typhi, rDNA fingerprinting as a tool in epidemiological analysis of, infections, 565
Salmonellosis, the social and economic impact of, 335
Salmonella enteritidis, the prevalence of, and other *Salmonella* spp. among Canadian registered commercial chicken broiler flocks, 203
Sandfly fever viruses, high prevalence rates of antibody to three (Sicilian, Naples and Toscana) among Cypriots, 685
Shigella flexneri, molecular epidemiology of plasmid patterns in, types 1–6, 321
Staphylococcus saprophyticus, phage typing of, 557
Statistical methods applied in microbiology and epidemiology, 467
Streptococcus suis, a longitudinal study of natural infection of piglets with, types 1 and 2, 121
Streptococcus uberis, antigenic and genetic homogeneity of, strains from the bovine udder, 297
Streptococcus uberis, genotypic and phenotypic analysis of, isolated from bovine mammary secretions, 543
Swimming pool, an outbreak of cryptosporiosis associated with a, 497

Toxoplasmosis, evaluating the sensitivity and predictive value of tests of recent infection: in pregnancy, 527
Transplantation, relationship between cytomegalovirus and colonization of the orpharynx by Gram-negative bacilli following renal, 411
Treponema hyodysenteriae, application and evaluation of enzyme-linked immunosorbent assay and immunoblotting for detection of antibodies to, in swine, 285

Vibrio cholerae, genetic diversity among toxigenic and nontoxigenic, O1 isolated from the Western Hemisphere, 227

Water, bacteriological quality of potable, sources supplying Morogoro municipality and its outskirts: a case study in Tanzania, 479
Waterborne, an outbreak of, cryptosporidiosis in Swindon and Oxfordshire, 485

Yeasts, HSP 90, and *Corynebacterium jeikeium*, 273
Yersinia enterocolitica, the serological relationship between, O9 and *Escherichia coli* O157 using sera from patients with yersiniosis and haemolytic uraemic syndrome, 349
Yersiniosis, the serological relationship between *Yersinia enterocolitica* O9 and *Escherichia coli* O157 using sera from patients with, and haemolytic uraemic syndrome, 349
